

AIBIZ: Artificial Intelligence for Business Professionals

Course ID #: 7000-273-ZZ-Z

Hours: 2

Course Content

Course Description:

Artificial intelligence (AI) is not just another technology or process for the business to consider—it is a truly disruptive force, one that delivers an entirely new level of results across business sectors. Even organizations that resist adopting AI will feel its impact. If the organization wants to thrive and survive in this transforming business landscape, it will need to harness the power of AI.

This course is designed to help business professionals conquer and move beyond the basics of AI to apply AI concepts for the benefit of the business. It will give you the essential knowledge of AI you'll need to steer the business forward.

Course Objectives:

Upon successful completion of this course, students will be able to:

- Identify ways in which AI can bring significant value to the business.
- Describe AI fundamentals.
- Identify the functions of AI in business.
- Implement business requirements for AI

Prerequisites:

To ensure your success in this course you should have a foundational knowledge of business processes and general business concepts. You should also have at least a basic understanding of information technology resources and systems, including networks, computers, and other electronic devices used in the enterprise.

Target Audience:

This course is primarily designed for business leaders, consultants, product and project managers, and other decision-makers who are interested in growing the business by leveraging the power of AI. Other individuals who wish to explore basic AI concepts are also candidates for this course.
