

Adobe CS6 Design Tools: Photoshop, Illustrator, and InDesign Illustrated

Course ID#: 0590-400-C6-W

21 Hrs

Course Content

Course Description:

This course covers the essential skills for working with Adobe InDesign CS6, Photoshop CS6, and Illustrator CS6 brings relevancy to your course while helping students maximize their potential with the software. The course materials have easy-to-follow and easy-to-absorb two-page spread lessons which appeal to a wide variety of learning styles. Also included are case studies that provide a variety of interesting and relevant exercises for students to practice skills, allowing students to independently work through cases with confidence and creativity.

There are 'Trouble and Quick Tip boxes' within the step-by-step exercises to help users avoid typical errors and pitfalls, creating a seamless and user friendly learning experience. Included are end-of-unit activities, such as Independent Challenges and Visual Workshops to bring relevancy to concepts and give students extra practice with the skills covered in the unit. This course utilizes 'Clues to Use boxes' to provide useful information related to the lesson skill.

If you are wanting a good 'quick start' to using the Adobe Design Tools, this class is ideal!
