Advanced Certified ScrumMaster (A-CSM)

Course Content

Course Description:

Accelerate your scrum journey. Distinguish yourself as an Advanced Scrum EXPERT.

Our workshops are not a one-way knowledge transfer. Participants play, build, create, debate, and collaborate throughout the learning process.

What Participants Get:

- A-CSM® certification after attending the workshop and trainer assessment
- Workbook and reference guide
- Advanced understanding of the scrum framework and how to implement it
- 2-year membership with Scrum Alliance
- Access to a specially designed logo to highlight your certification
- Profile page on the Scrum Alliance website
- 16 PDUs & 16 SEUs
- Payments towards this workshop may be eligible for tax purposes
- Understanding of how to scale Scrum from small-sized to large, multi-continent projects

Prerequisites:

Valid Certified Scrum Master (CSM) certificate with 1-year ScrumMaster experience.

Target Student:

ScrumMaster, Business Analyst, Product Manager/Owner, Project manager or Middle Manager, Developer or Test engineer, Technical Lead, Architect, any other Development related roles.

Topics:

Why Agile:
- Agile/Scrum Foundation, Agile Manifesto – the definition of Agile

Scrum Theory:
- The three pillars of Scrum: Transparency, Inspection and Adaptation.

Scrum Framework:
- The meetings, ceremonies, artifacts, and roles which make up the Scrum framework.

Scrum Practices:
- Product Vision, Estimation, Sprint, Backlog, and release planning.

Scrum Leadership:
- What is it and why is it important for a ScrumMaster?

People Management:
- Helpful tips and techniques to resolve conflicts for building strong teams
