Course Content

Course Description:

As organizations look for better and more efficient ways to deliver their GIS content, many are turning to online mapping with ArcGIS Online.   To offer an even more focused and powerful online GIS experience to their users, they are incorporating ESRI's Web App Builder with ArcGIS Online. Web App Builder provides them the ability to rapidly create and deliver specific online mapping applications based on their own online GIS content but without the need to write code or become web developers.

Target Student:

Those who are comfortable with ArcGIS Online and want to develop web-based applications using their online content.

Prerequisites:

Attendees should have knowledge of Microsoft Windows® and have a comfortable working knowledge of ArcGIS Desktop and ArcGIS Online.

Topics:

Module 1: What is Web App Builder

Module 2: Ready to Use Apps

Module 3: Customizable Apps

Module 4: The Web App Builder Interface

Module 5: Incorporating Widgets
