

Course Content

Course Description:

Articulate Studio Training – Presenter, QuizMaker, Engage, and Replay provide students with the knowledge and hands-on practice they need to rapidly develop e-Learning course modules, create compelling Flash presentations and interactive simulations. Users will also learn how to take their Powerpoint presentations and add interactivity and narration. In addition to learning key concepts, students also learn best practices for creating quizzes with Articulate Quizmaker and publishing Articulate projects.

Target Student:

This course is for new users and existing Articulate users who may want to gain more professional experience using the most valuable features, functions and techniques used in real world applications. No prior experience is necessary.

Articulate appeals to a wide variety of audiences, typically grouped in training and education, advertising, sales and marketing, or technical support and content creation/documentation roles.

Instructional System Designers will find this course beneficial in leveraging their skills and careers in online content development.

Prerequisites:

Because of the amount of material we cover in class, we do require students to be comfortable using a mouse, opening and saving files, and the general operations of computers. While we will make every reasonable effort to help, students with insufficient skills may be required to observe the class lessons or do their best to keep up without slowing down the rest of the class. We highly recommend working with the application tutorial before coming to the course.
