

CLDADM: Introducing Cisco Cloud Administration

v1.0

Course ID #: 1575-979-ZZ-W

Hours: 35

Course Content

Course Description:

Introducing Cisco Cloud Administration (CLDADM) v1.0 is a 5-day training program that will help prepare you for the CCNA Cloud certification, an associate-level certification specializing in cloud technologies.

At Course Completion:

Upon completing this course, you will be armed with the necessary knowledge and skills to perform the essentials of cloud administration and operations.

Target Student:

Data center engineers who wish to add cloud knowledge to their data center skills

Network engineers who are looking to develop their careers with cloud knowledge and skills

Deliver Method:

This course is delivered through a mix of instructor-led training (ILT) and hands-on labs.

Course Objectives:

- Cisco UCS Director
- Cisco Prime Service Catalog
- Virtual Application Container Services
- Identify the components of the Cisco cloud management software solution
- Understand the fundamentals of cloud infrastructure administration
- Reporting and charge-back
- Provision clouds using pre-configured templates
- Perform cloud management, monitoring, and remediation
