Hours: 4
Delivery Method: Group Internet Based

Course Content

Description:

In this course, you will cover: Every time you check email, log into a cloud app, or perform any number of job tasks using technology, you're a potential target for cyber threats—and a critical line of defense.

This course empowers everyday technology users like you with the awareness and habits needed to protect yourself and your organization from these threats. You'll learn how to recognize threats, avoid common traps, and use today's digital tools—including artificial intelligence (AI)—more safely.

Whether you're in the office, at home, or on the move, you'll walk away from this course with the confidence to use technology more securely. And, you'll have the knowledge and skills to contribute to a strong culture of cybersecurity wherever you work.

Objectives:

Upon successful completion of this course, students will:

- Use technology, including generative artificial intelligence (AI), responsibly.
- Resist social-engineering attacks.
- Secure devices such as desktops, laptops, tablets, smartphones, and more.
- Use the Internet securely.

Prerequisites:

To ensure success in this course, students should have experience with the basic use of computing technology, including desktop, laptop, or tablet computers; mobile phones; and basic Internet functions such as web browsing and email.

Target Audience:

This course is designed for all users of computers, mobile devices, networks, and the Internet, regardless of technical ability. It is also designed to assist students in preparing for the CertNexus® CyberSAFE® (Exam CBS-510): Cyber Safety in the Age of AI credential.
