

DB2110: DB2 11 for z/OS Transition - What Administrators Need to Know

Course ID#: 0370-228-DB-W

21 Hrs

Course Content

Course Description:

This workshop will prepare you to support the migration to DB2 11 and exploit the new features. The course begins with an overview of the migration process and helps you understand what you need to do in order to be ready. You will then consider many of the most popular new features and be able to exploit and support them in your environment.

Audience:

Database Administrators and System Administrators that will be performing or supporting a migration from DB2 10 to DB2 11 for z/OS.

Prerequisites:

Significant administration experience on a previous release of DB2 for z/OS.

Topics:

Introduction

Migration Considerations

Scalability Enhancements

Schema Enhancements

Utility Enhancements

Performance

Application Features
