

Developing Salesforce Lightning Aura Components (SP-DEX601)

Course ID #: 7000-437-ZZ-Z

Hours: 40

Course Content

Course Description:

This class is to help Salesforce Developers and other Technicians quickly learn the basics of building Salesforce Lightning Aura Components. This class is an alternative to the Programming Aura Components (DEX601) class offered by Salesforce.

Prerequisites:

Programmatic Development using Apex + Integrating with the Salesforce Platform (SP-DEV503) or equivalent experience with Salesforce development using Apex

Topics:

This class is delivered by a senior instructor with many years of real-world programming experience and will cover the following topics:

- The Lightning Component Framework as well as Standard and Base Components
- The Aura Framework and Developer Console
- Server Side and Client Side Architecture
- Javascript, CSS, and HTML/XHTML as they pertain to Lightning
- Building Complex, Nested Components
- Localization, Documentation, Locker Service
- Handling Events using Platform Events and the Streaming API
