

# Exam Readiness: AWS Certified Solutions Architect - Associate

Course ID #: 7000-056-ZZ-Z

Hours: 4

## Course Content

### Course Description:

In this course, you will learn how to prepare for the exam by exploring the exam's topic areas and how they map to architecting on AWS and to specific areas to study. The AWS Certified Solutions Architect – Associate exam validates technical expertise in designing and deploying scalable, highly available, and fault-tolerant systems on AWS. The course reviews sample exam questions in each topic area and teaches you how to interpret the concepts being tested so that you can more easily eliminate incorrect responses.

### Course Objectives:

In this course, you will:

- Navigate the logistics of the examination process
- Understand the exam structure and question types
- Identify how questions relate to AWS architectural concepts
- Interpret the concepts being tested by an exam question
- Allocate your time studying for the AWS Certified Solutions Architect – Associate exam

### Prerequisites:

- Architecting on AWS
- At least one year of hands-on experience designing and deploying scalable, highly available, and fault-tolerant systems on the AWS platform
- In-depth knowledge of at least one high-level programming language

### Target Audience:

- Solutions architects who are preparing to take the AWS Certified Solutions Architect – Associate exam

### Topics:

#### Lesson 1:

- Testing center information and expectations
- Exam overview and structure
- Content domains and question breakdown
- Topics and concepts within content domains
- Question structure and interpretation techniques
- Practice exam question
