

Informatica Data Quality for Analysts v10.5x

Course ID #: 0835-402-10.1-W

Hours: 21

Days: 3

Course Content

Course Description:

In this course, you will cover an overview of the Informatica Data Quality Analyst tool.

Informatica Analyst is a thin web browser interface that enables the business user to interact with the Data Quality Management process. The business user/ Analyst plays an essential role in the lifecycle of the Data Quality process. This course focuses on Data profiling, creating business rules and reference tables that can be shared with the Developers through Metadata/Repository.

We also focus on the collaboration methods between Developers & Analysts which is a key feature of IDQ.

Prerequisites:

None.

Target Audience:

- Business Analysts
- Developers
