

NPDESI: Designing and Implementing Cisco Networking Programmability

Course ID #: 1575-NPD-ESI-W

Hours: 35

Course Content

Course Description:

Deploying Cisco Jabber (DCJAB) is a 2-day training program designed to provide the necessary skills to deploy a Cisco Jabber on-premise solution. During class, we will train Cisco Unified Communications administrators to meet the deployment requirements by configuring DNS, CUCM and IM&P servers, profile pictures, and Microsoft Active Directory in preparation for deployment of an on-premise Cisco Jabber solution.

If you're an IT professional seeking to learn more about Cisco Jabber cloud deployment or Cisco Jabber training itself, this course offered by NterOne is a valuable experience. Learn more about course requirements, expectations, and relevant modules by reading below.

At Course Completion:

Upon completing this course, the learner will be able to meet these overall objectives:

- Describe the requirements for Jabber deployment
- Configure DNS, CUCM, IM&P, and Active Directory for Jabber integration

Target Student:

The primary audience for this course is as follows:

- System Engineers
- Administrators
- Architects
- Channel Partners

Prerequisites:

The knowledge and skills that the learner should have before attending this course are as follows:

- Familiarity with Cisco

NPDESI: Designing and Implementing Cisco Networking Programmability

Course ID #: 1575-NPD-ESI-W

Hours: 35

Topics:

- Module 1: Cisco Jabber Overview
- Module 2: Requirements for Jabber Deployment
- Module 3: Configuring CUCM for Jabber Deployment
- Module 4: Configuring IM&P for Jabber Deployment
- Module 5: DNS Configuration
- Module 6: Installing Cisco Jabber
- Module 7: Adding Photos to User
- Module 8: URI Dialing
- Module 9: Using Jabber Features
- Module 10: Collaboration Edge
- Module 11: Troubleshooting
