

# SAFe Advanced Scrum Master (SASM)

Course ID #: 2210-110-ZZ-W

Hours: 14

## Course Content

### Course Description:

This two-day course prepares current Scrum Masters for their leadership role in facilitating Agile team, program, and enterprise success in a Scaled Agile Framework (SAFe®) implementation. The course covers facilitation of cross-team interactions in support of program execution and relentless improvement. It enhances the Scrum paradigm with an introduction to scalable engineering and DevOps practices, the application of Kanban to facilitate the flow of value, and supporting interactions with architects, product management, and other critical stakeholders in the larger program and enterprise contexts. The course also offers actionable tools for building high-performing teams and explores practical ways of addressing Agile and Scrum anti-patterns in the enterprise.

### Course Objectives:

Upon course completion, student will be able to:

- Apply SAFe principles to facilitation, enablement, and coaching in a multi-team environment
- Build a high-performing team and foster relentless improvement at scale
- Address Agile and Scrum anti-patterns
- Support the adoption of engineering practices, DevOps, and Agile architecture
- Learn to apply Kanban eXtreme Programming (XP) frameworks to optimize flow and improve the team's work
- Facilitate program planning, execution, and delivery of end-to-end systems value
- Support learning through participation in Communities of Practice and innovation cycles

### Prerequisites:

All are welcome to attend the course, regardless of experience.

However, having one or more of the following certifications is highly recommended for those who intend to take the SAFe® 5 Advanced Scrum Master (SASM) certification exam:

- SAFe® 5 Scrum Master (SSM) certification
- Certified Scrum Master (CSM) certification
- Professional Scrum Master (PSM) certification

### Target Student:

- Program or Project Manager
- Scrum Master
