Salesforce Platform App Builder (SP-DEX403)

Course Content

Description:

In this course you will cover the foundation of designing, building and deploying custom applications using the declarative customization capabilities of the Lightning Platform and to help students prepare for the Salesforce Certified Platform App Builder exam. This class is an alternative to the Declarative Development for Platform App Builders in Lightning Experience (DEX403) class offered by Salesforce.

Objectives:

Upon successful completion of this course, students will:
- How to create, manage and update data models
- Application security, business logic and process automation
- Customizing applications for mobile use
- Designing reports and dashboards
- Deploying custom applications

Prerequisites:

Salesforce Administration in Lightning (SP-ADX201) is recommended

Target Audience:

- Salesforce System Administrators
- Salesforce System Developers

Topics:

Lesson 1: How to create, manage and update data models

Lesson 2: Application security, business logic and process automation

Lesson 3: Customizing applications for mobile use

Lesson 4: Designing reports and dashboards

Lesson 5: Deploying custom applications
