

WS-012T00: Windows Server 2019 Hybrid and Azure IaaS

Course ID #: 7000-381-ZZ-Z

Hours: 21

Course Content

Course Description:

This three-day course is intended primarily for IT Professionals who have experience with managing an on-premises Windows Server environment. Its purpose is to prepare professionals for planning, implementing, and managing environments that include Azure IaaS-hosted Windows Server-based workloads. The course covers how to leverage the hybrid capabilities of Azure, how to migrate virtual and physical server workloads to Azure IaaS, and how to manage and secure Azure VMs running Windows Server 2019.

At Course Completion:

After completing this course, student will be able to:

- Describe the foundational principles of Azure IaaS, including compute, storage, and networking.
- Identify tools used to implement hybrid solutions, including Windows Admin Center and PowerShell.
- Implement identity in Hybrid scenarios, including Azure AD DS on Azure IaaS and managed AD DS.
- Integrate Azure AD DS with Azure AD.
- Manage and monitor hybrid scenarios using WAC, Azure Arc, Azure Automation and Azure Monitor.
- Enhance hybrid security using Azure Security Center, Azure Sentinel, and Windows Update Management.
- Implement File Services in hybrid scenarios, using Azure Files and Azure File Sync.
- Plan and implement hybrid and cloud-only migration, backup, and recovery scenarios.
- Deploy Azure VMs running Windows Server 2019, and configure networking, storage, and security.
- Manage and maintain Azure VMs running Windows Server 2019.

Prerequisites:

- Experience with managing Windows Server operating system and Windows Server workloads in on-premises scenarios, including AD DS, DNS, DFS, Hyper-V, and File and Storage Services
- Experience with common Windows Server management tools (implied by the first prerequisite).
- Basic knowledge of core Microsoft compute, storage, networking, and virtualization technologies (implied by the first prerequisite).
- Basic knowledge of on-premises resiliency Windows Server-based compute and storage technologies (Failover Clustering, Storage Spaces).
- Basic experience with implementing and managing IaaS services in Microsoft Azure.
- Basic knowledge of Azure Active Directory.
- Basic understanding security-related technologies (firewalls, encryption, multi-factor authentication, SIEM/SOAR).
- Basic knowledge of PowerShell scripting.

WS-012T00: Windows Server 2019 Hybrid and Azure IaaS

Course ID #: 7000-381-ZZ-Z

Hours: 21

Target Student:

This three-day course is intended for IT Professionals who manage on-premises Windows Server environments and want to use Azure to manage server workloads and secure virtual machines that are running on Windows Server 2019. Secondly, this course benefits any role that involves administrative and operational tasks targeting Microsoft Azure Infrastructure as a Service (IaaS) workloads.

Topics:

Module 1: Introducing Azure Hybrid IaaS with Windows Server 2019

- Overview of Azure IaaS
- Overview of the Azure hybrid model
- Using hybrid admin tools

Module 2: Implementing identity in hybrid scenarios

- Implementing AD DS on Azure IaaS
- Integrating AD DS with Azure AD
- Implementing managed AD DS environments

Lab : Implementing integration between AD DS and Azure AD

- Preparing Azure AD for integration with AD DS
- Preparing on-premises AD DS for Azure AD integration
- Downloading, installing, and configuring Azure AD Connect
- Verifying integration between AD DS and Azure AD
- Implementing Azure AD integration features in AD DS

Module 3: Facilitating hybrid management and operational monitoring in hybrid scenarios

- Windows Admin Center
- Azure Arc
- Azure Monitor
- Azure Automation

Lab : Using Windows Admin Center in hybrid scenarios

- Provisioning Azure VMs running Windows Server 2019
- Implementing hybrid connectivity via Azure Network Adapter
- Deploying Windows Admin Center gateway in Azure
- Verifying functionality of Windows Admin Center gateway in Azure

Module 4: Implementing security solutions in hybrid scenarios

- Azure Security Center
- Azure Sentinel
- Managing Windows Updates

Lab : Using Azure Security Center in hybrid scenarios

- Provisioning Azure VMs running Windows Server 2019
- Configuring Azure Security Center
- Onboarding on-premises Windows Server 2019 into Azure Security Center
- Verifying the hybrid capabilities of Azure Security Center

WS-012T00: Windows Server 2019 Hybrid and Azure IaaS

Course ID #: 7000-381-ZZ-Z

Hours: 21

Module 5: Implementing file services in hybrid scenarios

- Implementing Azure Files
- Implementing Azure File Sync

Lab : Implementing Azure File Sync

- Implementing DFS Replication in your on-premises environment
- Creating and configuring a sync group
- Replacing DFS Replication with File Sync-based replication
- Verifying replication and enabling cloud tiering
- Troubleshooting replication issues

Module 6: Deploying and configuring Azure VMs

- Deploying Azure VMs
- Configuring Azure VM networking
- Configuring Azure VM storage
- Configuring Azure VM security

Lab : Deploying and configuring Windows Server 2019 on Azure VMs

- Authoring ARM templates for Azure VM deployment
- Modifying ARM templates to include VM extension-based configuration
- Deploying Azure VMs running Windows Server 2019 by using ARM templates
- Configuring administrative access to Azure VMs running Windows Server 2019
- Configuring Windows Server 2019 security in Azure VMs

Module 7: Managing and maintaining Azure VMs

- Managing Azure VMs running Windows Server 2019
- Maintaining Azure VMs running Windows Server 2019

Lab : Managing Azure VMs running Windows Server 2019

- Provisioning Azure VMs running Windows Server 2019
- Managing Windows Server 2019 in Azure VMs by using Windows Admin Center
- Managing Windows Server 2019 in Azure VMs from Cloud Shell by using PowerShell Remoting
- Managing Windows Server 2019 in Azure VMs by using Run Command
- Managing Windows Server 2019 in Azure VMs by using the serial console
- Managing Windows Server 2019 in Azure VMs by using Azure Policy Guest Configuration

Module 8: Planning and implementing migration and recovery services in hybrid scenarios

- Azure Migrate
- Storage Migration Server
- Azure Site Recovery
- Storage Replica
- Azure Backup

Lab : Implementing Azure-based recovery services

- Implementing the lab environment
- Creating and configuring an Azure Site Recovery vault
- Implementing Hyper-V VM protection by using Azure Site Recovery vault
- Implementing Azure Backup
