AlignAI

Data Analytics Bootcamp
From analyzing ad-hoc data sets to converging and visualizing in modern tool stacks!

REGISTER TODAY!

Starting August 13th
Tuesdays & Thursdays, 1:00 pm - 5:00 pm

LEARNING OBJECTIVES:

- Understanding data management and key attributes for exploratory data analysis.
- Acquire essential programming and Python basics, fostering logic, data structure handling skills, algorithmic thinking, and problem-solving abilities.
- Transforming data quality by implementing processes, measurements, and monitoring.
- Utilizing framework to transform data into insights.
- How to gather requirements & ask the right questions.
- Adopting a product mindset around analytics.
- Able to scope data sets and solutions for improvement of business acumen.

Advance your skills in Data Analytics by learning how to leverage tools beyond Excel.

You will not only understand the relevant tools but how to effectively use data and communicate with it to provide relevant insights and drive data-driven decisions within your organization.

All Inclusive Pricing: $12k
